

NAME

`dvicopy` – produce modified copy of DVI file

SYNOPSIS

dvicopy [*options*] [*infile* [*outfile*]]

DESCRIPTION

This manual page is not meant to be exhaustive. The complete documentation for this version of can be found in the info file or manual *Web2C: A TeX implementation*.

dvicopy reads a DVI file, expands any references to virtual fonts to base fonts, and writes the resulting DVI file. Thus you can use virtual fonts even if your DVI processor does not support them, by passing the documents through **dvicopy** first.
