NAME

  bg5conv – convert a TeX document in Big 5 encoding into 'preprocessed' form.

SYNOPSIS

  bg5conv < *infile* > *outfile*

DESCRIPTION

  Big 5 encoding for traditional Chinese uses the characters {, }, and \ which have special meanings in TEX documents.

  After processing a LATEX 2$_\varepsilon$ document which contains Big 5 characters with **bg5conv** you need not care about these special characters.

  This filter is part of the **CJK** macro package for LATEX 2$_\varepsilon$.

SEE ALSO

  sjisconv(1), **cefconv**(1), **cef5conv**(1), **cefsconv**(1), **extconv**(1),
  the **CJK** documentation files.
